THE

AMERICAN JOURNAL

OF

SCIENCE AND ARTS.

CONDUCTED BY

PROFESSORS B. SILLIMAN, B. SILLIMAN, JR.,

AND

JAMES D. DANA,

IN CONNECTION WITH

PROF. ASA GRAY, OF CAMBRIDGE,
PROF. LOUIS AGASSIZ, OF CAMBRIDGE,
DR. WOLCOTT GIBBS, OF CAMBRIDGE,
PROF. S. W. JOHNSON, OF NEW HAVEN,
PROF. GEO. J. BRUSH, OF NEW HAVEN.

SECOND SERIES.

VOL. XXXVII.—MAY, 1864.

NEW HAVEN: EDITORS.
1864.

PRINTED BY E. HAYES, 426 CHAPEL ST.

CONTENTS OF VOLUME XXXVII.

NUMBER CIX.

Page.

Art I. Theory of Earthquakes; by Professor Alexis Perrey, 1

II. The Classification of Animals based on the principle of Cephalization; by James D. Dana.—No. II. Classification of Insects, - - - - - - - - - - 10

III. On Fossil Insects from the Carboniferous formation in Illinois; by James D. Dana, - - - - - - - - - 34

IV. The Density, Rotation and Relative Age of the Planets; by Prof. Gustavus Hinrichs, Iowa State University, - - 36

V. Researches on the Platinum metals; by Wolcott Gibbs, M.D., 57

VI. Tubularia Not Parthenogenous; by Prof. Henry James Clark, 61

VII. Contributions from the Sheffield Laboratory of Yale College. —No. VI.—On Tephroite; by Geo. J. Brush, - - 66

VIII. Crystallographic Examination of the Acid Tartrates of Cæsia and Rubidia; by Josiah P. Cooke, Jr., - - - - - 70

IX. Geographical Notices, No. XIX.—Speke and Grant's exploration of the sources of the Nile, 75.—Unger's scientific results of a tour in Greece and the Ionian Islands, 79.—Guyot's Physical Wall-maps of the Continents, 80.—Prof. Whitney on the highest mountains of the United States and of North America, 81.—Prof. J. D. Whitney's Survey of California—Proposed Maps, 82.—Recent Australian Explorations: Explorations from Adelaide across the Continent of Australia; by J. McDouall Stuart, 84.—Exploration of the Interior of Australia; by Mr. Landsborough, 85.—Explorations in the Interior of Australia by the Burke Relief Expedition, under Mr. J. M'Kinlay, 86.—Dr. Livingstone's recent exploration of the Niassa Lake, 87.—Exploration of the River Vermejo, in the Argentine Confederation—Mr. Porter C. Bliss, 88.

Page.

X. Review of Holbrook's Ichthyology of South Carolina, - - 89

XI. U. S. Coast Survey Reports for the years 1861 and 1862, 95

XII. Proceedings of Learned Societies—Address of the President of the Royal Society, - - - - - - - - 100

SCIENTIFIC INTELLIGENCE.

Physics.—Electrical properties of Pyroxyline-Paper and Gun-cotton, by Prof. JOHN JOHNSTON, 115.—On the wave lengths of certain spectral lines, J. MÜLLER, 116.

Chemistry.—On a new metallic oxyd, BAHR, 116.—On solid arseniuret of hydrogen, WIEDERHOLD: On the crystalline form of sulphate of thallium, VICTOR VON LANG: On a crystallized hydrate of soda, HARMS: On the constitution of Columbite, H. ROSE, 117.—On alloys containing tungsten, CARON, 118.—On a new series of metallic oxyds, H. ROSE, 119.—On compounds of silicium with oxygen and hydrogen, WÖHLER, 120.—The characteristics of Thallium—Derived from statements of Crookes, Lamy and Böttger, and from original observations, 121.

Analytical Chemistry.—Estimation of Sulphuric Acid in salts of the alkalies, STOLBA, 122.

Photography.—Dry Process, by MM. TEISSERE et JACQUEMET, 123.—Another modification of the dry process, 124—also by JULHIET, 125.

Metallurgy.—On the occurrence of Titanium in Pig Iron, and some Remarks on the use of titaniferous Minerals in the manufacture of Iron and Steel, by EDWARD RILEY, F.C.S., 126.—On Aluminum and Aluminum-bronze, by I. L. BELL, 133.—Processes of Silver and Gold Extraction, by GUIDO KUESTEL, 134.

Agricultural Chemistry.—Die Chemie in ihrer Anwendung auf Agricultur und Physiologie, etc., also the Natural Laws of Husbandry, by JUSTUS von LIEBIG, edited by JOHN BLYTH, M.D., 135.—On a function of Roots, HENRICI, 136.

Geology.—Contributions to Paleontology, by Prof. JAMES HALL, 137.—Preliminary Notice of the Fauna of the Potsdam sandstone, etc., with a letter to M. Joachim Barrande, by JAMES HALL: Preliminary Notice of some species of Crinoidea from the Waverly sandstone series of Summit County, Ohio, supposed to be of the age of the Chemung group of New York, by JAMES HALL: A Monograph of the Fossil Estheriæ, by Prof. T. RUPERT JONES, F.G.S., 140.

Astronomy and Meteorology.—On the new Planet Eurynome, (79), by Prof. JAMES C. WATSON, 140.—Shooting Stars on the night of November 13th-14th, 1863, 141.—Additional Communications on Shooting Stars, 145.

Miscellaneous Scientific Intelligence.—Expedition to the Desert of Sahara under Messrs. Martins and Escher von Linth: Mount Hope Nurseries, Rochester, N. Y., 146.—The Chemical Chair in Berlin: Prof. Watson's new Asteroid discovered at Marseilles and Vienna: Prof. Ogden N. Rood, 147.

Book Notices.—A Text-book of Geology, by JAMES D. DANA, 147.—A Tract on Crystallography, by W. H. MILLER, M.A., etc.: Descriptions of Fossil plants collected by Mr. George Gibbs, by Dr. J. S. NEWBERRY: Reminiscences of Amherst College, by EDWARD HITCHCOCK, 148.—Frick's Physical Technics: Waitz's Introduction to Anthropology, translated by J. T. COLLINGWOOD, F.G.S., etc.: Petroleum vein in Northwestern Virginia, by J. P. LESLEY, 149.

Obituary.—Henry Fitz, 149.—Prof. E. Emmons, 151.

Titles of Works received, 152.

Transactions of Societies—American Academy of Arts and Sciences: Journal of the Acad. of Nat. Sci., Feb. to Nov., 1862: Proceedings of the Acad. Nat. Sci. of Philadelphia, 156.

NUMBER CX.

Page.

ART. XIII. The Classification of Animals based on the principle of Cephalization; by JAMES D. DANA.—No. III. Classification of Herbivores, - - - - - - - - - 157

XIV. Note on the position of Amphibians among the classes of Vertebrates; by JAMES D. DANA, - - - - - - 184

XV. On Celestial Dynamics; by Dr. J. R. MAYER, - - - 187

XVI. Second Notice of Recent Researches relating to Nebulæ; by A. GAUTIER, - - - - - - - - - - 198

XVIII. On the action of very weak Electric Light on the Iodized Plate; by Prof. OGDEN N. ROOD, - - - - - - 207

XIX. On the Invisibility of Nebulous Matter; by D. TROWBRIDGE, 210

XX. Remarks on the family Pteriidæ, (= Aviculidæ) with descriptions of some new fossil genera; by F. B. MEEK, - 212

XXI. On some Minerals of the Chlorite Group; by JOHN B. PEARSE, - - - - - - - - - - - 221

XXII. Notice of a small collection of Fossils from the Potsdam Sandstone of Wisconsin and the Lake Superior Sandstone of Michigan; by Prof. ALEXANDER WINCHELL, - - 226

XXIII. On the Orbits of Binary Stars; by Prof. DANIEL KIRKWOOD, 233

XXIV. On the best Mode of presenting, in a popular form, the Theory of the Tides, with suggestions for constructing illustrative apparatus; by WILLIAM DENNIS, - - - 234

XXV. Analysis of a Meteorite from Chili; by Prof. CHARLES A. JOY, - - - - - - - - - - - 243

XXVI. Contributions to Lithology; by T. STERRY HUNT, M.A., etc., 248

SCIENTIFIC INTELLIGENCE.

Physics.—On the passage of radiant heat through polished, rough, and smoked rock-salt, and on the diffusion of rays of heat: H. KNOBLAUCH, 267.

Chemistry.—On a cyanid of phosphorus, HÜBNER and WEHRHAUE: On Indium, REICH and RICHTER, 269.

Mineralogy and Geology.—Eusynchite and Dechenite, C. CZUDNOWICZ, 270.—Göthite from Lake Superior: Szaibelyite, 271.—Astrophyllite, F. PISANI: Bragite, J. A. MICHAELSON: On Organic Remains in the Laurentian Rocks of Canada, by Sir W. E. LOGAN, F.R.S., 272.—On Glaciers and other phenomena connected with the Himalayas, 273.

Botany.—Nomenclature, 278.—Annales Musei Botanici Lugduno-Batavi, edidit F. A. Guil. Miquel, 281.—Martius, Flora Brasiliensis, 283.—Species Genera et Ordines Algarum, auctore Jacobo Georgio Agardh: Phycologia Australica; a History of Australian Seaweeds: Thesaurus Capensis, &c.: The Plants indigenous to the Colony of Victoria; described by Ferdinand Müller, Ph.D., M.D., etc.: Notice sur les Plantes de Michaux et sur son Voyage au Canada et a la Baie d'Hudson, d'après son Journal manuscrit et autres documents inédits, par l'Abbé Ovide Brunet, 286.—Botany of N. W. America along the British Boundary: Ink-Plant (Coriaria thymifolia), 287.—Botanical Necrology for the year 1863—Professor Martin Martens: Dr. Christian von Steven: Prof. C. H. B. Alfred Moquin-Tandon: Francis Boott, M.D., 288.—Jacques Gay, 292.

Astronomy.—Comet IV, 1863, 292.—Comet V, 1863: Comet VI, 1863, 293.—Letter from Prof. James C. Watson on the discovery of Comet VI: Notes on η Argus, by F. Abbott, Esq., 294.

Miscellaneous Scientific Intelligence.—Account of the casting of a gigantic (Rodman) Gun at Fort Pitt Foundry, 296.

Book Notices.—First Outlines of a Dictionary of the Solubilities of Chemical Substances. By Frank H. Storer, 301.—Chambers' Encyclopedia: A Practical Handbook of Medical Chemistry; by John E. Bowman, F.C.S.: Dana's Manual of Geology, 302.

Obituary.—Edward Hitchcock, 302.—Giovanna Plana: Heinrich Rose: Cappocci, 304.

NUMBER CXI.

Page.

Art. XXVII. On the Diptera or two-winged Insects of the Amber-fauna, (Ueber die Diptern-fauna des Bernsteins): a lecture by Director Lœw, at the meeting of the German naturalists in Kœnigsberg, in 1861, ... 305

XXVIII. Abstract of Prof. Meissner's Researches on Oxygen, Ozone, and Antozone; by S. W. Johnson, ... 325

XXIX. Glacial Action about Penobscot Bay; by Mr. John De Laski, ... 335

XXX. Contributions from the Sheffield Laboratory of Yale College. No. VII.—On the Indirect Determination of Potash and Soda; by Peter Collier, B.A., ... 344

XXXI. Contributions to Chemistry from the Laboratory of the Lawrence Scientific School; by Wolcott Gibbs, M.D.—1. On the relations of hyposulphite of soda to certain metallic oxyds.—2. On the determination of nitrogen by weight.—3. On the separation of cerium from didymium and lanthanum.—4. On the separation and estimation of cerium.—5. On the quantitative separation of cerium from yttrium, aluminum, glucinum, manganese, iron and uranium.—6. On the employment of fluohydrate of fluorid of potassium in analysis, ... 346

Page.

XXXII. On Shepard's Paracolumbite; by F. Pisani, - - 359

XXXIII. On the Cretaceous and Superior Formations of West Tennessee; by Jas. M. Safford, - - - - - - 360

XXXIV. On the Influence of Ozone and some other Chemical Agents on Germination and Vegetation; by M. Carey Lea, 373

XXXV. Remarks on the Distillation of Substances of different Volatilities; by M. Carey Lea, - - - - - - 377

XXXVI. The original accounts of the displays in former times of the November Star-Shower; together with a determination of the length of its cycle, its annual period, and the probable orbit of the group of bodies around the sun; by H. A. Newton, - - - - - - - - - - - - 377

XXXVII. Note on the Product of the Reaction between the Monosulphid of Potassium and the Bromid of Ethylene, and on several compounds derived from it; by J. M. Crafts, - 390

XXXVIII. On the mechanical and chemical treatment of Gold and other metals; by James D. Whelpley, - - - 401

XXXIX. Mineralogical Notices; by Charles Upham Shepard, 405

SCIENTIFIC INTELLIGENCE.

Physics and Chemistry.—On the spectrum of carbon, Attfield: On the optical distinction between hypermanganic acid and compounds of sesquioxyd of manganese, Hoppe-Seyler: On the action of light upon nitro-prussid of sodium, Roussin, 408.—On the barometer, as an indicator of the earth's rotation, and the sun's distance, by Pliny Earle Chase, 409.—On Mauve or Anilin purple, Perkin, 413.—On Crystals in Blowpipe Beads, by George H. Emerson, 414.—Elements of Chemistry, Theoretical and Practical, by William Allen Miller, M.D., LL.D, etc., 415.

Mineralogy and Geology.—Volcano of Kilauea, Hawaii: I. Letter from Rev. T. Coan, 415: II. Letter from Rev. O. H. Gulick, 416.—On Glacial Phenomena in Nova Scotia, by B. Silliman, Jr., 417.—Synopsis of the Flora of the Carboniferous Period in Nova Scotia, by J. W. Dawson, LL.D., etc., 419.—Report of J. D. Whitney, on the Geological Survey of California, 427.—Large Mass of Native Copper, by J. B. Townsend: Laurentian Rhizopods of Canada, in a letter from T. Sterry Hunt, F.R.S., 431.—Ueber zwei neue dyadische Pflanzen, by Dr. H. B. Geinitz: Beiträge zur Kenntniss der organischen Ueberreste in der Dyas und über den Namen Dyas: Appendix to the third edition of the Antiquity of Man, by Sir Charles Lyell: A popular and practical exposition of the Minerals and Geology of Canada, by E. J. Chapman, Ph.D., 432.

Botany and Zoology.—On the Popular Names of British Plants, by R. C. A. Prior, M.D., etc., 433.—Cosson et Germain de Saint-Pierre, Flore des Environs de Paris—Synopsis Analytique de la Flore des Environs de Paris, 434.—Des Fleurs de Pleine Terre, comprenant la Description et la Culture des Fleurs Annuelles, Vivaces, et Bulbeuse de pleine terre, etc., par Vilmorin-Andrieux: Monographia Generis Lepigonorum, auctore N. C. Kindberg, 435.—Kongliga Svenska Fregatten Eugenies Resa, etc.—Botany of the Galapagos Islands, by N. J. Andersson: Caroli Wright Lichenes Insulæ Cubæ,

curante EDVARDO TUCKERMAN: Observations on the Genus Unio, together with descriptions of new Species, their soft parts, and embryonic forms in the Unionidæ, by ISAAC LEA, LL.D., etc., 436.—List of the Polyps and Corals sent by the Museum of Comparative Zoology to other Institutes in exchange, with Annotations, by A. E. VERRILL: Prospectus of a Monograph of the Tetraoninæ, or Family of the Grouse, by the author, D. G. ELLIOT, 437.

Miscellaneous Scientific Intelligence.—On the Yellow Coloration of faded Photographic Prints, by M. CAREY LEA, 438.—Magnesium Light for Photography, by Prof. ROSCOE: Preservation of Animal Substances, PASTEUR: The difficulties incident to the laying of long Electric Sea Cables, 440.—Permeability of Iron, 441.—Submarine Volcano in the Mediterranean, 442.—Water in Paris: Academy of Sciences, 443.—Spanish Scientific Expedition, 444.—Vegetable Ivory: Expedition to the Desert of Sahara, under Messrs. Martins and Escher von Linth: Periodical Meteors, 445.—National Academy of Sciences, 446.—Maury's Sailing Directions, and Wind and Current Charts, 447.—*Obituary.*—Wm. J. Taylor, 447.

Miscellaneous Bibliography.—Boston Journal of Natural History, 447.—National Almanac and Annual Record, for the year 1864, 448.—Notices of New Works and Proceedings of Societies, 448–450.

Index, 451.

ERRATA.

Pages 39 to 56, in title, for "A. Hinrichs," read "G. Hinrichs."—P. 212, l. 3 from bottom, for "*Pinna,* and *Avicula Modiola,*" read "*Pinna, Avicula* and *Modiola.*"—P. 214, l. 14 from top, for "*M. perattennuata,*" read "*M. perattenuata.*"—P. 216, lines 17 and 22 from top, for "hinge in which," read "hinge of which."—P. 219, l. 14 from top, for "smooth, rounded," read "smoothly rounded."—P. 422, l. 1 from bottom, for "longifola," read "longifolia,"—P. 423, l. 7 from top, for "Loshii," read "Loschii."
